---

Lance may need them for Wilcox Oil. For this purpose I'm sure Lydia would provide some enforcement money if Lance wanted to pursue this approach.

Hi Kevin.

That is an interesting question. We still have access to aerial photos but it is handled differently. I no longer had a budget for aerial photos, so funding will have to come from Carlene or enforcement and to a person in HQs that does all the coordination. You can submit a request to see what historical photos that they may have or may be able to get. What site are you needing photos on?

Hi LaDonna –

Is the Lockheed contract for aerial analysis still active, or is it finally done? If it's closed out, do you know of any alternatives for aerial photographs that are as old as possible (pre-1950s be best). Lance may have a need to obtain them.

Thanks  
Kevin
